

# 5G NR Air Interface

5G\_308d | On-Demand | 5G Access | ⚙️

Course Duration: 2 days

This learning takes an in-depth look at the 5G New Radio (NR) Air Interface and key operations that enable a 5G Standalone (SA) network to support the 5G services.

## Intended Audience

Design, Development, and Performance Engineers of Radio Network, Device, and Tools.

## Objectives

After completing this course, the student will be able to:

- Describe the frame structure with numerology of the 5G NR air interface
- List downlink and uplink signals and channels and describe their function
- Identify key steps of network acquisition, random access, and connection setup
- Explain how data is transferred in the downlink and the uplink
- Step through the handover and idle/inactive mode operations
