# Introduction to VoLTE

## LTE\_501x | Expert-Led Live | LTE and VoLTE | Expert Course Duration: 1 day

Since its standardization over a decade ago, VoLTE, or Voice over LTE, has been deployed by operators around the world. Compared to the traditional circuit-based 2G/3G voice solutions, VoLTE provides better voice experiences, enables rich multi-media communications features, and makes the network more efficient for operators. This course provides an overview of the LTE and IMS network architecture supporting VoLTE, and the key technologies used in VoLTE such as IMS and SIP. The course also covers high level information on key scenarios in VoLTE signaling and operations, media support, VoLTE interworking, roaming, and air interface enhancements for VoLTE. This course is delivered in a blended format, including two live web sessions along with self-paced multimedia content, allowing students to learn in bite-sized chunks over a three-week interval.

#### **Intended Audience**

This blended (self-paced and instructor-led) course is intended for a technical audience looking for an overview of the drivers for VoLTE and a basic understanding of the underlying technologies being considered.

#### **Objectives**

After completing this course, the student will be able to:

- Describe the architectural elements of the LTE and IMS networks used to support VoLTE
- Discuss benefits of VoLTE compared to traditional circuit-based 2G/3G voice
- Explain key VoLTE signaling and operational scenarios including registration and call processing
- Identify the key technology building blocks needed for VoLTE
- Describe the network functions involved in VoLTE interworking and roaming
- Discuss key air interface enhancements for VoLTE
- List the key KPIs (Key Performance Indicators) used to measure VoLTE performance

Course Prerequisites
Welcome to LTE

### Outline

1. Kickoff Session [Live: Web-based]
 1.1 Course Overview
 1.2 VoLTE Overview

2. The LTE Network2.1 LTE RAN and Core2.2 LTE Attach and PDN Connection Setup2.3 QoS in LTE2.4 IMS Architecture

- 3. VoLTE Operations
- 3.1 VoLTE Registration
- 3.2 VoLTE Call Origination/Termination
- 3.3 EPS Bearers and DRBs for VoLTE
- 4. VoLTE Media
- 4.1 Media Path and RTP
- 4.2 Introduction to 5G New Radio
- 4.3 Audio Codecs for VoLTE
- 4.4 RoHC and Other Air Interface Enhancements
- 5. VoLTE Interworking5.1 VoLTE to 3G/PSTN Call Setup5.2 3G/PSTN to VoLTE Call Setup5.3 Outbound Roaming

6. KPIs6.1 KPIs and Failures Overview

7. Review Session [Live: Web-based]
